

Audit Module

Activity logging and timeline — every user action is recorded with timestamp, actor, entity, and details.

Firm base path: `/api/v1/firm/audit`

Super Admin base path: `/api/v1/super-admin/audit`

1. Audit Log Structure

Each audit log entry stores:

Field	Description
id	Unique identifier (UUID)
action	What was done (CREATE, UPDATE, DELETE, etc.)
entity	Which entity type was affected
entityId	ID of the affected entity
actorId	ID of the user who performed the action
firmId	Firm context (null for global actions)
details	Human-readable description of what happened
createdAt	Timestamp (auto-set)

2. Audit Actions

Action	Meaning
LOGIN	User logged in
LOGOUT	User logged out
CREATE	Entity created
UPDATE	Entity updated
DELETE	Entity deleted
ACTIVATE / DEACTIVATE	Entity activated/deactivated

ROLE_CREATED / UPDATED / DELETED	Role changes
PERMISSION_ASSIGNED / REMOVED	Permission changes
CONFIG_UPDATED / DELETED	Config changes
PASSWORD_RESET	Password was reset
MFA_ENABLED / DISABLED	MFA status changes

3. Firm Admin Endpoints

Base: `/api/v1/firm/audit` `FIRM_ADMIN`

Method	Path	Description
GET	<code>/api/v1/firm/audit</code>	Full firm activity timeline (paginated, filterable by date)
GET	<code>/api/v1/firm/audit/users/{userId}</code>	Activity timeline for a specific user in the firm
GET	<code>/api/v1/firm/audit/entities/{entityType}/{entityId}</code>	Full history of a specific entity
GET	<code>/api/v1/firm/audit/actions</code>	Filter activity by action type

```
GET /api/v1/firm/audit?fromDate=2026-01-01&toDate=2026-07-24&page=0&size=20
Response: Paginated list of AuditLog entries (sorted by createdAt DESC)

GET /api/v1/firm/audit/users/{userId}?fromDate=...&toDate=...&page=0&size=20
Response: All activity by a specific user in this firm

GET /api/v1/firm/audit/entities/CASE/{entityId}?page=0&size=20
Response: Everything that happened to a specific case

GET /api/v1/firm/audit/actions?action=CREATE&fromDate=...&toDate=...
Response: All CREATE actions in the firm within the date range
```

4. Super Admin Endpoints

Base: `/api/v1/super-admin/audit` `SUPER_ADMIN`

Method	Path	Description
GET	<code>/api/v1/super-admin/audit/firms/{firmId}</code>	Get all audit activity for a specific firm
GET	<code>/api/v1/super-admin/audit/actions</code>	Platform-wide activity by action type

Audit logs are written asynchronously — they never block the main business logic. The `AsyncAuditWriter` service handles this in a background thread.
